(a) Source development: DEAM official static overall emotion
Train: 237 excerpts
Fit prediction heads
MERT features frozen
Validation: 60 excerpts
Checkpoint selection only
No final-test claim
Freeze source predictor
MERT + mean_mlp
No target neural training
Frozen predictions
(b) Main external validation: PMEmo complete choruses
Adaptation candidates
20 identity groups
Disjoint from evaluation
Output calibration only
5 or 10 rated songs
3 seeds x 10 shared draws
Evaluation: 334 groups
Paired method vs. none
Never used to fit correction
(c) Auxiliary development evidence: separate from external main test
DEAM expansion: 74 new tracks (country / pop)
Separate historical genre-specific models and fixed calibration policies
Auxiliary stage only; not PMEmo data, not an independent external test
